Converting Simple Plotly Plot to Dashboard with Dash

In [1]:
```
import plotly.offline as pyo
import plotly.graph_objs as go
from plotly import subplots
import plotly
import dash
import dash_core_components as dcc
import dash_html_components as html
import numpy as np
import pandas as pd

versions_of_modules_used = {dash.__name__ : dash.__version__,
                            dcc.__name__ : dcc.__version__,
                            plotly.__name__ : plotly.__version__,
                            html.__name__ : html.__version__,
                            np.__name__ : np.__version__,
                            pd.__name__ : pd.__version__}

for i, j in versions_of_modules_used.items():
        print(i,"=",j)
```

```
dash = 1.20.0
dash_core_components = 1.16.0
plotly = 5.1.0
dash_html_components = 1.1.3
numpy = 1.19.2
pandas = 1.1.3
```

Module Name	Module Versions
dash	1.20.0
dash_core_components	1.16.0
plotly	5.1.0
dash_html_components	1.1.3
numpy	1.19.2
pandas	1.1.3
